

# Forbidden Fruit

## BALANCE OF RISK:

**How do you like them apples?**

The risk of death associated with cannabis use is almost microscopic: during 2008, there were only 19 deaths related to cannabis use in the UK.

The statistical chance of death?

Cannabis : Less than  
 Asprin : 9 per 120,000  
 Paracetamol : 9 per 120,000

More people died due to using asprin than cannabis!

**\$40 BILLION**

That's how much is spent on the war on drugs per year, in the United States alone. But are narcotics as dangerous as the news media and zero-tolerance anti-drug groups claim? Find out how dangerous the forbidden fruit really is.

**Ecstasy**  
 risk of death  
 >1:14,000

**Alcohol Misuse**  
 risk of death  
 1:12,000

**Benzo**  
 risk of death  
 1:6,000

**Solvents**  
 risk of death  
 1:5,500

**Cocaine**  
 risk of death  
 1:4,000

**Heroin or Morphine**  
 risk of death  
 1:250

**RISK OF DEATH**  
 Associated with various drugs and narcotics
